Please provide some background information on your professional experience and expertise, including education and professional affiliations:

Xavier Lopez is Director of Oracle's Spatial Technologies group. He leads Oracle's efforts to incorporate location and semantic technologies across Oracle's database, application server, and business applications. He has eighteen years of experience in the area of geospatial technologies. He holds a Ph.D. in Spatial Information Engineering from the University of Maine, a Masters in Urban and Regional Planning from MIT, and an independent major in Geography from the University of California, Davis. He is the recipient of Fulbright, Ford and UC Berkeley Postdoctoral Fellowships to carry out advanced research in information policy topics. He has been active in numerous academic and government research initiatives on geographic information, including a Member of the US National Academies of Science Committee on Mapping and Earth Sciences. He is the author of a book on government spatial information policy and has authored over 100 scientific and industry publications in areas related to spatial information technology
