

United States Geospatial Intelligence Foundation 2010 Graduate Scholarship Nomination Form

INCOMING OR CURRENT GRADUATE LEVEL STUDENT (Doctorate)

Please enter all of the information requested below and follow the submission instructions at the bottom of this form.
Deadline for Submission is May 1, 2010

Nominee Contact Information

Full Name(s) _____

College/University (Doctorate) _____ GPA _____

Campus (City/State) _____ Major _____

Permanent Home Address _____

Phone _____ Email _____

U.S. Citizen? Yes No • If no, what is your citizenship? _____

Academic Background

Degree #1 Completed: BS/BA Master's Date _____

College/University _____ GPA _____

Campus (City/State) _____ Major _____

Degree #2 Completed (if applicable): BS/BA Master's Date _____

College/University _____ GPA _____

Campus (City/State) _____ Major _____

Degree #3 Completed (if applicable): BS/BA Master's Date _____

College/University _____ GPA _____

Campus (City/State) _____ Major _____

Instructions

In evaluating scholarship applications, USGIF will first look at the nominee's overall qualifications as demonstrated through academic course work and extracurricular activities. Answers to the first four questions below receive more credit for demonstrated interests that relate to geospatial intelligence. Training and experience in the use of geospatial technologies – within the domain of geographic information science (GISc) and including remote sensing, geographic information systems, and cartography/visualization – are relevant but should not be interpreted as an end objective; rather, they should be viewed as tools for achieving larger goals.

The essay should demonstrate the nominee's comprehension of geospatial issues and how his/her graduate studies (especially a Master's thesis and Doctoral dissertation) advance the field of geospatial studies and geospatial intelligence. Nominees who are majoring in a field other than geospatial studies (or equivalent) must explain in detail how their future work depends upon and/or benefits geospatial intelligence. Again, knowledge of or training in GISc tools might be relevant but should be considered in context of larger geospatial intelligence challenges/objectives. Essay originality is important in its evaluation.

Each of the four questions is equally important. Each letter of reference is weighted the same as a question. The essay is weighted about the same as the total for the questions. That is, each question is worth roughly 10% (40% total), the essay is approximately 40%, and each letter of reference is about 10% (20% total).

USGIF evaluates nominations on a peer-to-peer basis – Doctorate program graduate students will only be judged relative to other Doctorate program graduate students.

Please answer each question below in 250 words or less, using the space provided:

1. Describe the highlights of your graduate studies so far. What was the most interesting, most challenging, or most rewarding aspect of research you have completed up to this time? Why?

2. Describe your college extra-curricular activities (e.g., hobbies, personal projects, community service, and professional societies). [Do not include employment, internships, or course-related activities.]

3. Describe any professional experience you have that is related to your studies (include full-time, part-time and summer employment, plus teaching/research assistantships, internships and work-study programs).

4. List any scholastic, professional or civic recognition you have received. Also list any publications or professional affiliations (certifications, licenses, or professional societies).

Essay

The mission of the USGIF is “to promote the geospatial intelligence tradecraft and to develop a stronger community of interest between government, industry, academia, professional organizations and individuals who share a mission focus around the development and application of geospatial intelligence to address national security objectives.”

Write an essay on *how your doctorate research will advance the USGIF mission*. Complete the essay on separate pages (font size 11 or 12, double-spaced, 5 pages maximum) and attach it to this nomination submission.

Letters of Recommendation

Submit two letters of recommendation. At least one of these letters should be from an appropriate college/university professor or dean.

Transcripts

Submit one copy of your graduate academic transcripts. [An unofficial copy is allowed.]

Submission Instructions

Mail the completed application to the address listed below. If you wish to submit this form through email, please send the completed application and **all** supporting materials to scholarships@usgif.org along with your name and “*USGIF Scholarship: Graduate Application (Doctorate)*” in the subject line. Before sending your nomination, please remember to attach the nomination form and all supporting documentation. **Applications without all requested materials will not be considered.**

United States Geospatial Intelligence Foundation

ATTN: Scholarships Subcommittee
2325 Dulles Corner Blvd., Suite 450
Herndon, VA 20171

The deadline for submissions is May 1, 2010.

All materials must be received on or before this date, including letters of reference.

University Financial Contact

Please provide a name or department and address, plus any other information (i.e., a point of contact or phone number), to which USGIF should send the scholarship check should you be awarded.

NOTE: All materials submitted to USGIF for consideration will be held by the Scholarship subcommittee and will not be returned to nominees. Please do not send originals of any supporting documents.

By submitting this form, the nominee agrees to be included in any promotional opportunities surrounding the USGIF scholarships program, including use of nominee’s name and likeness.
