

Annette L. Redmond
Director, Technology and Innovation Office
Intelligence and Research Bureau
Department of State

Annette L. Redmond joined the Department of State on 3 September, 2017. She assumed the duties of the Department's newly created Technology and Innovation Office (TIO). As Director of TIO, she provides executive leadership and management for the Department's Intelligence Information Technology enterprise. Annette is responsible for leading the Department's and the Intelligence and Research Bureau's modernization efforts for their Intelligence Information Technology Enterprise in partnership with the Intelligence Community (IC). Her efforts ensure the delivery, security and protection of these networks and IT systems and provide Intelligence access to both foreign policy and intelligence professionals in the Department.

Annette has previously served in the IC and Department of Defense (DOD) for more than 30 years both as a retired Army officer and senior civilian. She most recently served in senior executive positions at Army serving as the Army's Intelligence CIO. In this capacity, she was responsible for direction and oversight of global Intelligence Information Management/Information Technology (IM/IT) capabilities for over 59,000 Intelligence military, civilian, and contractor professionals. She earlier served as the Enterprise Advisor to the Commanding General (CG) of US Army Intelligence and Security Command (INSCOM). There she provided senior intelligence operations expertise, judgement, and advice on national, joint, coalition, and Army Intelligence requirements.

In over 21 years as an Army Military Intelligence officer, Annette served in numerous assignment in increasing responsibility. She was an exceptional leader, commander, operational intelligence expert, and soldier at tactical and strategic echelons, command and staff elements, always driving to mission success. Her duties and accomplishments have cut across many facets of intelligence operations and of information technology, data management and system interoperability. She is known for her enthusiasm, collaborative leadership style and Can-Do attitude.

Ms. Redmond holds a BA in Criminal Justice from Norwich University, an MS in Strategic Intelligence from the National Intelligence University, and Chief Information Officer (CIO) Certification.
