

Robert H. (Bo) Ewald

Bo Ewald has lengthy experience in the technology industry as a user, engineer, customer and executive with some of the leading high performance computing, quantum systems and computer graphics companies. He is currently the CEO of ColdQuanta, a pioneer in ultracold-atom quantum systems. For the previous six years, he was President of D-Wave International, the world's first commercial quantum computing company.

Prior to that he was Executive Chairman of Perceptive Pixel, the company that pioneered large screen, touch sensitive displays. Previously he was CEO of computer graphics pioneer Silicon Graphics, and President/COO of Cray Research, the first supercomputer company. Bo began his management career at the Los Alamos National Laboratory as the head of its Computing and Communications Division. He has been the CEO/Chairman of several start-up companies including Linux Networx, EStamp and Scale8.

He is involved in various industry organizations and was appointed to the President's Information Technology Advisory Committee by Presidents Clinton and Bush. He has also served on the Boards of several public and private companies and is a frequent speaker on technology directions.
