Help K-12 students learn about geospatial intelligence (GEOINT) and other STEM topics by participating in USGIF's STEMulate St. Louis! This event will excite and inspire K-12 students in the St. Louis region to learn more about GEOINT and the many career fields that require geospatial skills. We are seeking organizations to exhibit and provide a fun and educational demo/activity students can engage in at your table. You may provide marketing materials promoting your organization, but please note this event is meant to be interactive and engaging for K-12 students and parents and not a marketing pitch. Small giveaways for the children are encouraged!
