

NGA NATIONAL GEOSPATIAL-INTELLIGENCE AGENCY

Dr. Andrew L. Brooks Chief Data Scientist

Dr. Andrew L. Brooks is the Chief Data Scientist at the National Geospatial-Intelligence Agency (NGA). He prepares the Agency to create maximum value out of existing, new, and future forms of data. He is responsible for delivering high impact geospatial data science-related intelligence capabilities to decision makers, including policy makers, warfighters, intelligence professionals, and first responders around the world. These capabilities are a result of strategies he designs that draw on his expertise in user experience research, product management, and data science, and relate to the Agency's use of people, data, and technology. His work prepares the Agency and Intelligence Community (IC) to best confront and address future mission challenges.

Dr. Brooks has over a decade of experience in industrial research, product management, and marketing roles at startups and public companies. He earned his M.S. and Ph.D. in Information Management and Systems from the University of California, Berkeley. While earning his doctorate he provided strategic guidance to global corporations and organizations. He was a founding team member and instructor at the University of California, Berkeley's Masters in Information and Data Science program. He earned his Eagle Scout with the Boy Scouts of America.
