What is the SLAWG?

The SLAWG is a volunteer-based group formed under the U.S. Geospatial Intelligence Foundation (USGIF), a 501c3 educational nonprofit dedicated to supporting the geospatial intelligence tradecraft. It is a group of industry, government, academic and community partners with a goal to clarify pathways for education and training for geospatial careers and certifications in the St. Louis region, and identify needs for new pathways to integrate with existing efforts.

THE SOCIETY OF WOMAN GEOGRAPHERS
The Society of Woman Geographers was organized in 1925, by a group who felt that there should be some medium of contact between women engaged in geographical work and its allied sciences, —ethnology, archaeology, botany, natural history, sociology, folklore, arts and crafts, etc.

For Active Membership in this Society only those women are eligible who have done distinctive work whereby they have added something to the world's store of knowledge concerning the countries in which they have traveled.

Corresponding Members are those who fulfill the requirements for Active Membership, but who reside outside the United States of America and Canada.

The Associate Membership admits widely traveled women who are interested in furthering all forms of geographical exploration and research. It is believed that comradeship between such women and those whose profession is active geographical investigation, will be mutually stimulating and valuable.
