

GEOGala

USGIF is excited to host this year's GEOGala on Friday, December 3rd in Reston, VA. The black tie GEOGala will evolve its format to enable increased professional networking opportunities as we reunite in person. Join us as we bring together leaders from across the Defense, Intelligence, and Homeland Security public and private sectors for a night of celebration and fun.

As part of the new format, USGIF will be presenting the Arthur C. Lundahl-Thomas C. Finnie Lifetime Achievement Award. This prestigious award was named for Arthur C. Lundahl and Thomas C. Finnie, honoring their accomplishments—in imagery analysis and mapping, respectively—and their legacies within the GEOINT Community.

USGIF is pleased to announce that GEOINT community icon Stu Shea is the 2021 awardee. Stu has nearly four decades serving both government and industry in the intelligence, defense, aerospace and government services markets. His energy, customer focus and dedication of his life's work to the tradecraft of mapping, charting and geodesy (MC&G), imagery analysis, and intelligence make him the deserving candidate of this prestigious award. Stu currently serves as the CEO of

Peraton, where he leads the company's strategic direction, and drives the company's performance and culture through his vision and guidance. Stu is also a founder of USGIF and the highly acclaimed GEOINT Symposium. He serves on several industry, government, and academic advisory boards.
