

COMPLIANCE WITH COVID-19 HEALTH & SAFETY REQUIREMENTS: GEOINT SYMPOSIUM, OCT. 5-8, 2021

All event staff, venue employees and attendees will be required to follow the COVID-19 guidelines

COVID-19 GUIDELINES

The health and safety of event attendees is our #1 priority. We will continue to monitor the virus and work with local authorities to remain in compliance and help safeguard all staff and attendees. To achieve this, we need your help:

- We strongly recommend that all staff, venue employees, and attendees are fully vaccinated prior to the conference.
- People who are not fully vaccinated are required to show proof of a negative COVID-19 test taken within 48 hours prior to arrival at the conference venue.
- While in conference-controlled spaces (inclusive of off-site events) face coverings must be worn when not eating, drinking, or presenting.
- Where possible, practice social distancing.
- If at any time you do not feel well, please refrain from attending any event activities.
- It is everyone's responsibility to ensure safety and health during the event. If you see something that does not look right, please bring your concerns to a member of the organizing staff or venue personnel.
- All event staff, venue employees and event attendees will be required to comply with the following pre-event and event requirements. These requirements will be in place for the main conference venue as well as off-site venues.

Subject to change: based on CDC and local authority guidelines

PRE-EVENT REQUIREMENTS

- During the week leading up to the conference, each staff member, venue employee, and attendee will receive email with a link to a very brief COVID-specific survey.
- All attendees will be required to complete and submit the survey. To expedite the on-site screening process, we ask that you please complete and submit the survey prior to your arrival at the conference.
- Those who are fully vaccinated can submit the survey any time between receiving the survey link and arriving at GEOINT Symposium. Within this survey, you will be required to upload a copy of your vaccination card. Fully vaccinated people who do not wish to upload their vaccine card can fill out the survey on-site and show proof of vaccination to a representative.
- Non-vaccinated people must provide proof of a negative COVID-19 test taken within 48 hours prior to your first arrival at the conference venue. You will be required to take the survey on-site and either upload or show proof of a negative test.
- People who submit a survey that does not identify risk will receive a black QR code. Please save this, as it will be used as your access credential when first entering the conference venue.
- People who submit a survey that suggests risk will be contacted by DetectWise®.
- There is a testing center located close to the conference venue. Information will be provided on request.

All information stored in HIPAA compliant, secure cloud environment

EVENT REQUIREMENTS

- Upon arrival at the venue for the first time, all staff, venue employees, and attendees will be required to register at a DetectWise® kiosk located at each entrance. Individuals who completed the survey and received a black QR code will scan that at the kiosk.
- Conference and venue staff will be at hand to assist with this process.
- The kiosks will authenticate the QR code and take your temperature.
- Upon authentication of the QR code and successful temperature screening, a green checkmark will appear on the kiosk screen and the black QR code will turn green.
- If the QR code is not authenticated, or your temperature is high, a red X will appear on the kiosk screen and your QR code will turn red. If this occurs, a staff member will provide next step details.
- People who receive the green checkmark will be given a token that will allow access to the venue accreditation office. Accreditation will not be given to anyone without going through the above process.
- After receiving your event accreditation, you must go through the DetectWise® kiosk temperature screening each time you re-enter the venue.

QR code authentication and temperature screen takes approximately 2 seconds
